

The background is a complex marbled pattern. It features a base of dark navy blue and black, with intricate, vein-like structures in lighter shades of blue and white. Scattered throughout are small, irregular specks and streaks of a metallic gold or bronze color, giving it a rich, textured appearance.

SHADE VARIATION

v¹	UNIFORM APPEARANCE	v²	SLIGHT VARIATION
v³	MODERATE VARIATION	v⁴	RANDOM VARIATION

The color shade or shades of all tiles vary to some degree from piece to piece, for each single production. At least several pieces from the same production should be reviewed whenever possible to determine acceptable color shade variations. Any questions or concerns about your tile selection should be clarified prior to installation.

ABRASION RESISTANCE OF FLOOR TILES

	LOW TRAFFIC		MEDIUM TRAFFIC
	HEAVY TRAFFIC		EXTRA TRAFFIC

LOW TRAFFIC: Tiles suited for general residential traffic. For areas that are walked on by soft soled or normal footwear without any scratching dirt. Not suitable for kitchen, entrance halls, stairs and other areas subjected to medium traffic.

MEDIUM TRAFFIC: Tiles suitable for areas subject to frequent foot traffic yet protected from abrasive agents such as sand, gravel and soil; for example corridors, private kitchens, balconies, terraces, hotel rooms.

HEAVY TRAFFIC: Tiles suitable for areas subject to frequent foot traffic and heavy abrasion, for example shops, hotels, restaurants, bars, schools, offices. Particularly suitable for areas in direct contact with outside.

EXTRA TRAFFIC: Suitable for heavy traffic indoor and outdoor environments.

USER'S MANUAL

The information provided below has been prepared in order to guide the user for achieving maximum efficiency in usage of the tiles and ensuring usage for a long time.

SELECTION OF THE TILES

• Selection of ceramic materials has to be done with care in order that they are suitable for the usage conditions and they have a long life. Selection has to be made by taking into account the classification provided below based on the area of usage.

1. Wall Tiles: For indoor walls
2. Floor Tiles: For indoor floors and walls
3. Porcelain Tiles: For indoor floors and walls, outdoor floors, walls and facades
4. Technical Porcelain Tiles: For indoor floors and walls, outdoor floors, walls and facades

• Suitability of the products with the specifications of usage areas increases efficiency. As such, it would be beneficial to select products which are suitable for traffic intensity in areas where pedestrian traffic intensity is high. Information as to relevant traffic intensity is provided with the products.

ISSUES TO BE CONSIDERED IN APPLICATION

• Instructions must be followed carefully while applying the tiles. Tone and calibration controls of the tiles must be made before the application and care should be taken to ensure that products to be applied to an area are in the same tone and calibration. Products, with patterns following each other, must be laid in the same direction. The relevant instructions are provided on the boxes.

• Tiles are also applied in twisted layout applications. Twisting method is frequently used especially in rectangular form wood-like products. There may be deformations according to TSI standards due to usage of very high temperature during production of tiles. As such, wedge application it is very useful while applying big size products. This method will eliminate the defects arising from floor and labor and minimize considerable deformation levels which can occur during the production.

• The tiles should be applied with a certain joint space. Relevant joint spaces should be as follows: minimum in 1 mm in rectified tiles and 2 mm for best results and minimum 2 mm in unrectified tiles and 3 mm for best results.

USAGE CONDITIONS

• Ceramic tiles which cover living areas are getting more active and richer appearance with décor and border groups. As such, decorative purpose of décor and border products stands out more. The surface resistances and abrasion resistances of these products are not high compared to other products. Décor and border products contain metallic colors such as gold, platinum and copper. These products with metallic colors are abraded because of cleaning products which contains acid and they may get damaged by time. As such, décor and border products should not be cleaned with acid cleaning agents and must be cleaned with soap or with a damp cloth. You can see relevant information in our catalog near the product.
